## Profile

A dedicated and passionate Computer Science Engineering student at Sathyabama Institute of Science and Technology with strong knowledge of Java, SQL, and AWS. Experienced in developing efficient solutions and deploying applications using cloud technologies. Successfully completed hands-on projects and training to enhance technical skills. Committed to learning and growing while contributing to the success of the organization..

## SKILL SET

### TECHNICAL SKILLS

- Programming Language - JAVA
- SQL - Database Language
- AWS - EC2 Instance

### NON-TECHNICAL SKILLS

- Time Management
- Team Working
- Adaptability
- Communication

## Project Works

### AWS - Application Deployment

During my AWS project, I deployed a quiz web application using an EC2 instance. The process involved configuring the instance, setting up the application environment, and ensuring the application was accessible. This project gave me practical experience with cloud deployment and taught me how to manage resources on AWS effectively

### Predictive ML Model

I created a model to predict how much medical insurance will cost. I used techniques like linear regression to see how things like age and weight affect insurance prices. This can help insurance companies estimate costs better and also help people plan their healthcare budget. .

## Certificates

- NPTEL Certification on DBMS.
- Digital 101 Journey by Nasscom
- AWS developer Certified Training by CREDO SYSTEMZ.

## Participations:

- Won second prize in Memory Mania event in BIO ALCHEMIST Symposium.
- Participated in the event Connections of National Level Technical Workshop "TECHVIBHAV'22".
- Participated in the Plantations 2k23 event organized by the Eco Club, contributing to environmental awareness.
- Successfully completed one day Hands-On Training on 3D Printing @Makerspace.
